PACKAGES & ENGAGEMENT MODELS · 90 DAYS

Scale Pilot

Lock in the results and plan the rollout.

Synergy Axella
Results Through Expert Insight

Start with one production line, one department, or one measurable operational challenge.

BEST FOR	SCOPE
Multi-line plants or groups planning to roll out across sites.	A full area or plant, all shifts, 3 or more modules

WHAT'S INCLUDED

- Everything in the 60-day pilot
- Quality, maintenance and CI modules
- Management dashboards and KPI governance
- Integration plan for your ERP / MES data

DELIVERABLES

- Targets agreed upfront on 2 to 3 KPIs
- Signed-off ROI report
- Rollout plan and licence proposal

OUTCOME

Sustained results and a ready-to-approve plan for scaling.

How the pilot runs

01 · Baseline assessment	02 · Focused implementation	03 · Performance review	04 · ROI evaluation
Identify existing losses and establish performance measurements.	Configure the agreed monitoring and improvement workflow.	Track results, investigate losses, and evaluate corrective actions.	Compare outcomes against the baseline and determine the next phase.

Suggested pilot duration: 30-90 days, depending on scope and data readiness.
